# Our design and development process

---

## FREE CONSULTATION

We start every project with a Free Consultation. This is so you can decide if I'm the right developer for you.

## PROPOSAL

If you like what you see in the Free Consultation we will prepare a proposal which will outlay all costs, options and timelines. No surprises at the end of the project.

## KICK OFF

We start work the day the proposal is signed. This ensures your project is completed in the agreed timeframe.

## WIREFRAME DESIGNS

We work with you to design the structure and layout of the website right before we start building anything. This saves time and money - a win-win.

## WEBSITE BUILD

This is where the hard work starts and regular meetings are planned to keep your ideas at the centre of the design process.

## CONTENT UPLOAD

You give us the content and we'll publish it. Taking the hard work out of it for you and your team.

---

## REVIEW

Before we launch your website you will have a chance to review all aspects and request any changes you want.

## LAUNCH

Once we have your approval we will launch the site. After launch we will conduct a number of quality assurance tests to ensure everything is working as it should.

## MAINTAIN

We won't leave you in the dark. Right from the start we discuss a hosting and maintenance plan that's perfect for you.
